

My-Shortcut : A Single window shortcut manager for the most often visited places.

-by Kamal Awasthi(<https://github.com/KamalAwasthi>)

An autohotkey script to manage the shortcut for the most frequently visited places like. My Documents, My Computer, CMD, Windows Music Player etc.

HotKey: [Ctrl]+[Alt]+[b]

(you can change the hotkey in settings menu)

For Autohotkey Users: [ahkfiles\shortcut.ahk]

For Non-Autohotkey Users: [exefiles\shortcut.exe]

Instructions:

- Download the .zip file and extract.
- Go to the destination folder, and open the folder as described above.
- Double click the 'shortcut.exe(/.ahk)' file.
- It will add a shortcut to the startup so that the script runs automatically on every boot.
- Press the Hotkey to get started.
