Auto-Refresh : Refresh your browser from anywhere

-by Kamal Awasthi(https://github.com/KamalAwasthi)

An autohotkey script to refresh the currently active tab on Google Chrome. You can refresh the tab from anywhere, no need to go on the chrome and then refresh it.

Hotkey: [shift]+[Ctrl]+[r]

(You can change the hotkey in settings option given in tray menu)

For Autohotkey Users: [ahkfiles\Auto_Refresh.ahk]

For Non-Autohotkey Users: [exefiles\Auto_Refresh.exe]

Instructions:

- Download the .zip file and extract.
- Go to the destination folder, and open the folder as described above.
- Double click the Auto_Refresh file.
- It will add a shortcut to the startup so that the script runs automatically on every boot.
- Press the hotkey to refresh the tab.
